

Extra Blockouts Rule of Thumb (Strong-post W-beam)

Two blockouts may be used at any time, for any number of posts

Three blockouts may be used at one post only

11-14

Sometimes additional room is necessary behind the rail. This can be accommodated by adding block outs. A rule of thumbs is that one extra block out can be added whenever needed. A second block out (three total) can be added, but to only one post.
